A. जापान/JAPAN

बाज़ार की स्थिति/MARKET SITUATION

- The drastic fall in overseas contract price of shrimp has reflected in the domestic market shrimp price also, promoting active consumption in super markets. As the supply has improved, shortage has eased, except for big size of head-on shrimp and PD shrimp.
- The importers expect a further fall with harvest season in major producing countries, and hence abstain from placing bulk orders. The lull in other markets is also another reason for this approach. However, they cannot wait for long as it is time to place orders for O'bon holidays that fall in August. Importers feel that the pricing and supply of Indian vannamei will play a major role in the trade of shrimp this year, especially in Japan.
- Supply of big size Octopus to Japan is short this summer. This has increased the demand for octopus.

B. यूएसए/USA

बाज़ार की स्थिति/MARKET SITUATION

- **Latin American HLSO shrimp** are steady but with a somewhat unsettled undertone. Head-on shrimp maintain a similar tone.
- **Asian HLSO white shrimp** are barely steady to weak and unsettled.
- **P&D tail-on 16-20 and 21-25 count shrimp** are barely steady to weak. Some offerings of 13-15 count are also noted lower. The balance of that market is about steady.
- **P&D tail-off 21-25 and 26-30 count shrimp** are barely steady to weak; the balance of the market is about steady.
- **Black tiger shrimp** remain barely steady with a few lower offerings noted on both on HLSO and peeled shrimp.
- **Domestic Shrimp:** The headless shell-on shrimp market continues to adjust lower. Offerings are scattered, and largely reflective of individual holdings. There's a willingness to discount where inventories exist.
- **PUD's** were unchanged, and the smallest count sizes of P&D's moved lower.
