बाज़ार की स्थिति/MARKET SITUATION

- Handling volume of shrimp by major super markets is gradually up, as very good landing of shrimp expected from major supplying countries, including India. The BT shrimp from Indonesia shows domination in prestigious supermarkets, with prices lowered by a dollar. Domestic shrimps such as shiba ebi, kuruma prawn, Hokkaido deep sea shrimp etc are also appearing for sales in supermarkets. The market also faces a shortage for Indian Kolkatta Black Tiger.
- The overseas contract situation is very active fuelled by lowering of prices. However, some stakeholders are worried about a price crash with oversupply of shrimp to Japan.
- Surimi also faces short supply, especially for Asian Surimi.
- Rainy season may affect the seafood consumption negatively. However, it is reported that this year's rainy season may probably be just normal or a slightly shorter than usual.

बाज़ार की स्थिति/MARKET SITUATION

- 41-50 count and larger HLSO Latin American white shrimp are full steady for a fair demand. Smaller count shrimp are steady.
- 36-40 count and larger Asian HLSO white shrimp remain barely steady and unsettled with a few offerings noted lower.
- Small peeled tail-off Asian white shrimp are barely steady with a few lower offerings noted. The balance of the peeled white market is about steady.
- Black tiger shrimp remain barely steady and unsettled with some lower offerings noted on both on HLSO and peeled shrimp.
- Domestic Shrimp: Market values range barely steady to slightly weak. Offerings are scattered as the market adjusts to new season production and inventory valuations change. Production in the region has yet to reach scale, and buying interest remains fair.
