

**THE MARINE PRODUCTS EXPORT DEVELOPMENT AUTHORITY  
KOCHI -682 036**

File No: LAB-KOC/COVID/1/2022-QC

Date: 25/05/2022

**CIRCULAR**

During the recent meeting held on 19/05/2022 between the Director General of GACC and Indian Authorities, GACC has expressed strong concern over the failure of Indian system in containing the detection of Covid-19 nucleic acid material in seafood packages exported to China. They have also pointed out that India is the only country having maximum number of rejections, with over 300 detections reported from 115 units. GACC has also informed that they will take another review of the matter by mid - June 2022 to evaluate the actions taken by the Indian Authorities in controlling the detection of Covid-19 nucleic acid material in seafood packages exported to China to Zero, in accordance with the Zero Covid Policy adopted by Chinese Government.

In this regard, it is decided that MPEDA will take 1 batch (5 swabs) of samples every week from one processing unit exporting to China. The processing units will be selected randomly by the Regional / Sub Regional office of MPEDA from list of units attached as per their jurisdiction to monitor the effectiveness of Covid-19 preventive and cargo disinfection protocols adopted by the units. Altogether, 5 processing units will be covered per week by each office.

The samples will be drawn by MPEDA samplers as per the prevailing sampling procedures from food contact surfaces, product, packaging material and cold storage for analysis. The units will not be charged for these monitoring samples. The field offices may keep the samples drawn under refrigerated condition, and forward the pooled up samples (5 batches collected from 5 processing units i.e., 25 samples) every Friday evening to HO Lab under refrigerated condition. The RD/SRDs may ensure that adequate sampling vials with buffer are retained with them for undertaking this monitoring sampling activity. Additional vials and buffer, if required, may be requested well in advance.

Positive results, if any, will be reported to the processing units, SEAI as well as to the EIC / EIA for advising the unit to taking corrective actions. This exercise is intended to be done for 3 months from 30th May 2022.

Regional / Sub Regional Office - wise list of seafood processing units exporting to China is attached for your guidance and necessary action.
